Objective

DevOps Engineer with 3 plus years of experience in building scalable CI/CD pipelines, automating infrastructure, and implementing cloud-native solutions. Eager to leverage my skills in a challenging role to optimize deployment processes and enhance development workflows.

Professional Experience

DevOps Engineer

- *Over 3 plus years of experience working across diverse domains including CPaaS (Communication Platform as a Service), Electronics/IoT, and currently in the FinTech sector.*
- *Built and maintained CI/CD pipelines using Jenkins and GitLab CI for various microservice-based applications.*
- *Automated cloud infrastructure provisioning on AWS (EC2, ECS, RDS, Bedrock) using Terraform and CloudFormation.*
- *Containerized applications using Docker and orchestrated deployments using Kubernetes and Helm.*
- *Implemented centralized logging and monitoring using the ELK stack and Grafana for better observability.*
- *Building cryptographic inventory to secure organization Intranet, preparing the environment for quantum attacks in future.*
- *Collaborated with cross-functional teams to improve release cycles, deployment strategies, and incident response processes.*

Skills

- **DevOps Tools:** Docker, Kubernetes, Jenkins, Gitlab ci-cd, aws code-pipeline,
- **AWS:** EC2, S3, ECS, RDS, CloudWatch, DocumentDB, ElastiCache, ALB, Lambda function, SNS, Quicksight, IAM, WAF, VPC
- **Azure:** Virtual machine, vnet, Blob Storage, Entra ID, DevOps pipeline
- **IaC:** Terraform, CloudFormation
- **Monitoring/Logging:** ELK Stack, Grafana, Prometheus
- **Scripting:** Bash, Python
- **Version Control:** Git, GitHub, Bitbucket

Education

Bachelor of Engineering

Visvesvaraya Technological University, Bengaluru, Karnataka, India
